INSTRUCTIONS
FOR POLAR PANEL
2022

POLAR CONNECT

There are different control systems depending on which year model they apply to.

For the 2013-2018 model year, the system is called Remote.

2019 - 2022 Polar Connect.

This instruction applies to Polar connect 2020-2022 and is included in each caravan.

Start by downloading the Polar Connect app from the Appstore or Google Play Store.

Open the app to start the installation.
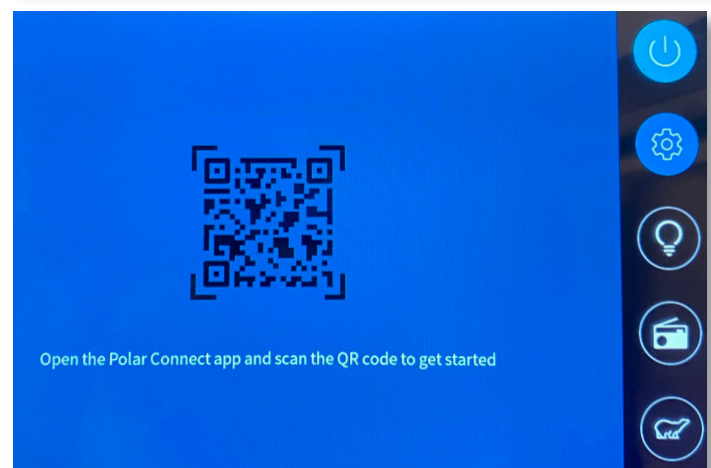

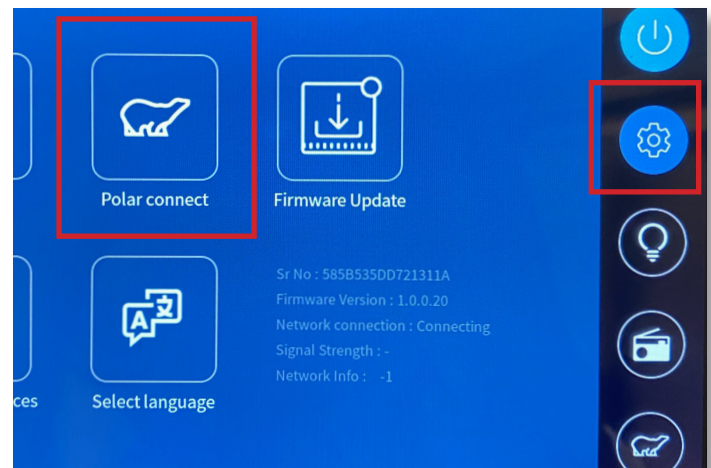

Click on "get started with polar connect".

The app opens the camera.

Go to settings in the Polar Panel - click on Polar connect to get the car's QR code. Enter the customer's email address. After this, the customer receives a verification email to the registered e-mail address.

After you have scanned the QR code, you have 30 minutes to complete the registration of the subscription.
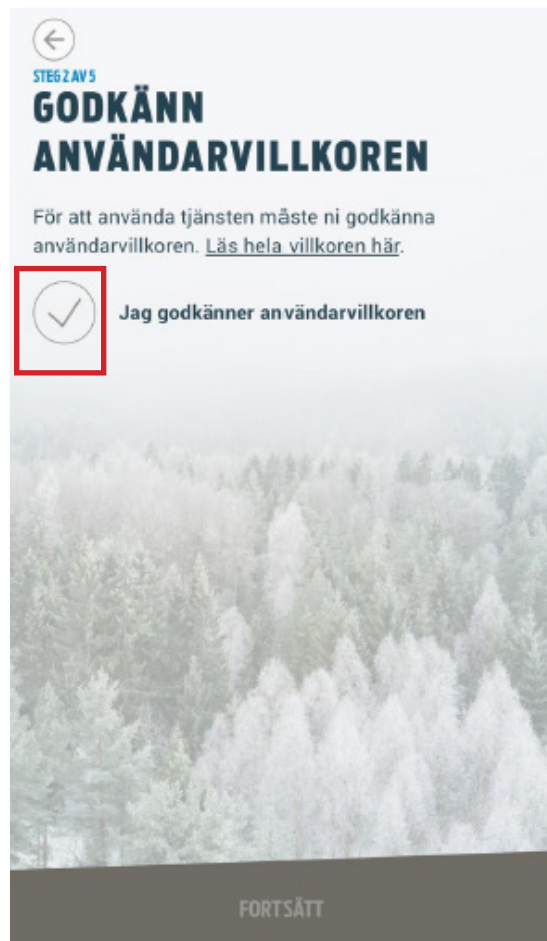

If it takes longer than 30 minutes, the system locks and you need to contact your dealer to unlock it.

Remember that if the caravan changes owners, you also need to terminate the Polar connect agreement.

Check the tab ¨I accept the terms of use¨ and then click on ″continue″.

Fill in your email address and then click
¨Create an account¨

EXTERNAL START OF ALDEPANNAN
## Raise and lower the temperature

Start the alde panel and press MENU.

Choose the desired temperatur and effect and the gas off. Press the gear at the bottom right corner.

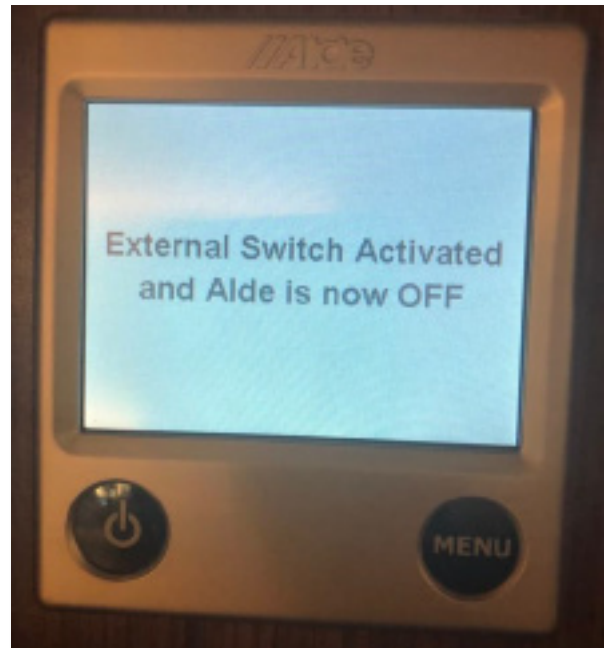

Scroll down until a box named EXT shows.

Click on EXT.

Scroll to the right or left until it says EXT and then hit the return arrow.

Turn off the Aldepanel and this text should show, and after a few seconds the display will become dark.

Open Polar connect and make sure that heaster is on and then set the desired temperature down below.

Note! It's not possible to change the temperature over the value you put in the aldepanel. For ex-ample, if the Alde display is set on 24 degrees, you cannot go over 24 degrees in the application.

GET STARTED WITH THE POLAR PANEL

Settings

Lightning

Radio

Back to main page

Change the language
Start by changing the language of the panel under the icon settings → Select language.

There is no save button. Once you have selected your language, click on the Polar Bear symbol at the bottom right of the panel to return to the home page.

Software update
Each caravan has a built-in SIM card. When a new software / firmware is available for download, you can find it and download it on the "firmware update" icon under settings.

Change light settings
Click on indoor lighting → Here are several different ones options to set the lighting in the carriage exactly as you want it.

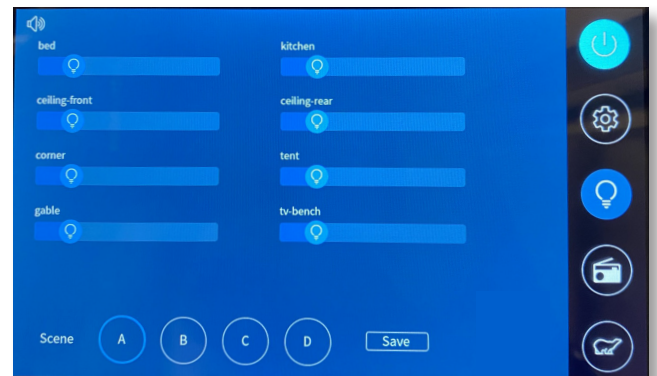

Drag the bars under each heading to adjust the lighting.

Save scenario
It is possible to save up to 4 different ones scenario.
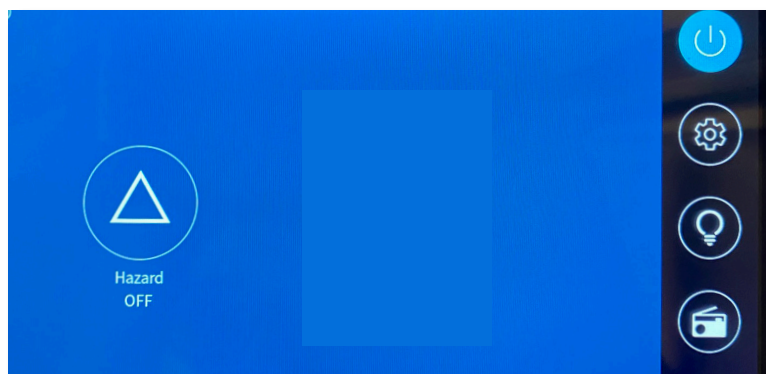

Click on the letter you want to save your scenario in → adjust the bars as you want it → click save changes.

To turn hazard on and off. Click on outdoor lighting in the start menu.

Click on the icons to turn the lighting on and off.

Climate
Click on the climate icon to start the alde pan, refrigerator and underfloor heating.

Here you start, among other things, the boiler, the refrigerator, electronics and the floor heat pump.

Water levels
Click on the Water icon to bring up the trolley water level bars.

Leveling of trolley
To see how the caravan is tilted, click on the icon Level meter. Here you can see how the caravan stands horizontally and vertically.

The adjustment is done with the help of the support legs.

Voltmeter
Calibrable voltmeter in the panel.

To calibrate the voltmeter, you must first measure the voltage across the battery terminals.

Click Settings → System.

Here you calibrate the voltage difference between it value you got from the battery and that is down in the panel.

RADIO

Volume

Scan

Channel search

Turn of radio

Channel search

Back to
main menu

Connect bluetooth
Under settings, you can also connect to the caravans bluetooth for streaming music or use the Polar connect app.

Click Settings → Bluetooth Devices → Add devices

Follow the instructions in the app in the Polar app to connect to the stroller.

When this screen is displayed, bluetooth is activated in the screen. Follow the instructions in the app to con-nect to the stroller.

NOTE! To connect to Bluetooth, you need to be inside the caravan.

Turn on bluetooth in your phone and search for new devices. Then there will be one called ¨Polarvagnen¨ Click on this.

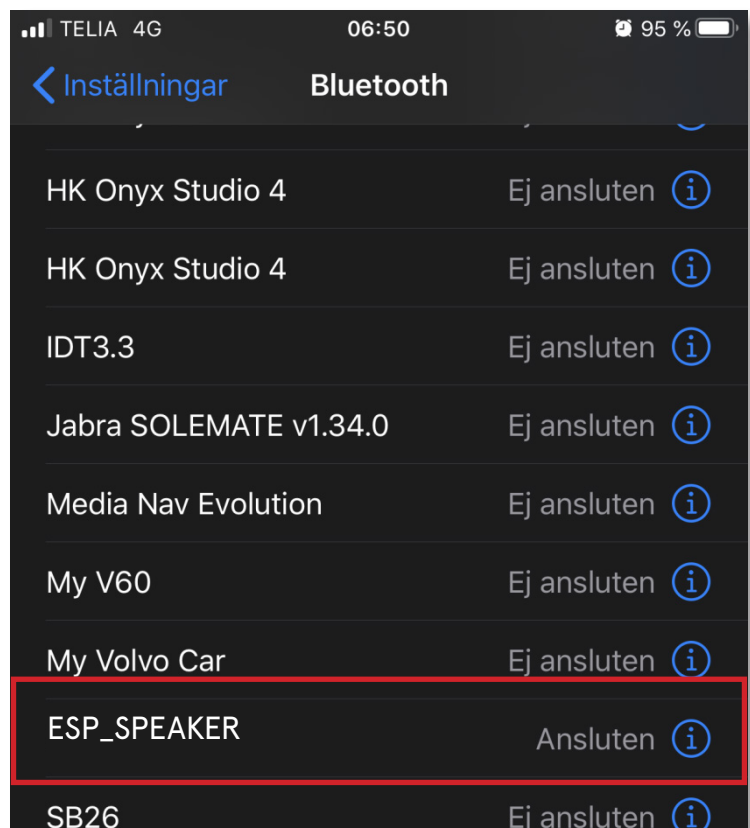

A code comes up, check that the code matches the code in the Polar Panel. If the code does not match, redo the installation.

After successful connection, it indicates that The "ESP_SPEAKER" is connected.

The polar panel indicates that the device is connected and ready to use.

Then open any streaming service to play audio through the caravans speaker system.
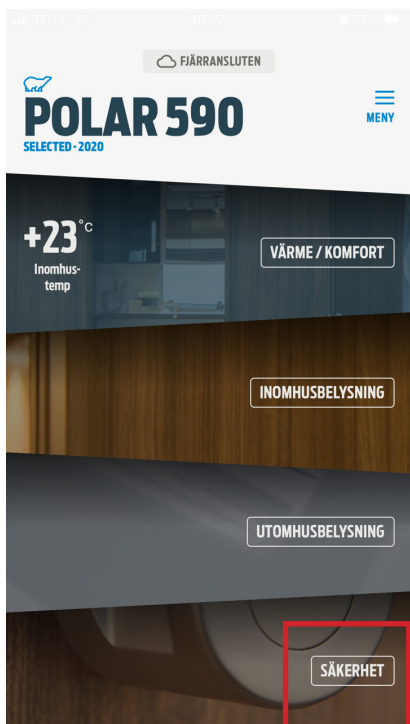

DAB radio

To switch between "FM" and "DAB", click on the symbol in the middle at the top of the screen.

The radio will then scan for channels and show which ones are available.

Polar connect app – Applies from carriage model year 2020

To activate the alarm function. Go to the app and click on security.

Motion alarm - if someone enters the caravan, you will receive a message via the Polar Connect app.
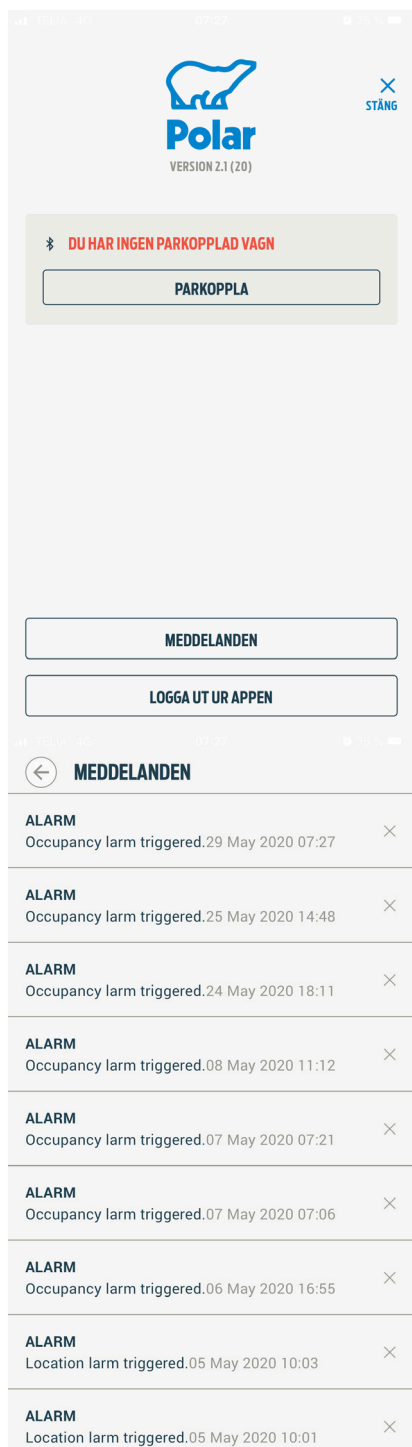

Position alarm - if the caravan is moved from its current location, you will receive a message via the Polar Connect app.

Click Motion Alarm to activate the motion detector in the ceiling. This means that if someone moves inside the car, a notice will be sent to your phone.

Click on the Position alarm symbol to activate the alarm. This means that if the trolley is moved from its position as it was when the alarm was activated, a notice will be sent to your phone.
